Summary

Aspiring DevOps Cloud Engineer with a background in Full Stack Development and a Bachelor of Science in Information Technology. Passionate about building reliable applications, automating workflows, and exploring modern cloud infrastructure. Experienced in developing full-stack applications using React, Node.js, Spring Boot, and databases while actively learning Linux, Docker, Git, CI/CD, and Microsoft Azure. Seeking opportunities to combine software development knowledge with DevOps practices to build, deploy, and maintain scalable cloud-based solutions.

Skills

Programming & Web Technologies:

Java, JavaScript, Python, React, Node.js, Spring Boot, HTML/CSS, REST APIs

●●●●○

DevOps & Cloud Technologies:

Linux, Git/GitHub, Docker, CI/CD Concepts, Microsoft Azure, Cloud Fundamentals, Infrastructure Automation (Learning)

●●○○○

Database & Tools:

MongoDB, MySQL, JWT, LaTeX, Postman

●●●●○

Design Tools:

Adobe Photoshop, Adobe Illustrator, Canva, UI/UX Principles

●●●●○

Soft Skills:

Leadership, Communication, Teamwork, Critical Thinking, Problem Solving

●●●●○

Cloud & DevOps Learning

Linux Administration Fundamentals – Linux Foundation (Learning)

Learning Linux system administration, command-line operations, file management, networking basics, and system troubleshooting.

Cloud Computing Fundamentals

Exploring Microsoft Azure, cloud infrastructure concepts, virtualization, and cloud deployment models.

DevOps Tools & Practices

Learning Git, Docker, CI/CD pipelines, containerization, and infrastructure automation concepts.

Education

University of Vavuniya

2023 – 2026

Bachelor of Science in Information Technology (BSc IT)
Transcript Pending)

Degree Requirements Completed (Official

Secondary Education

2021

G.C.E. Advanced Level – Physical Science

Projects

EduFlow-Registry (MERN Stack, JWT Auth)

A full-featured Course Registration System developed as a collaborative team effort. Engineered secure JWT authentication, interactive user dashboards, and an automated PDF generation system.

🔗 <https://github.com/THISHA123/EduFlow-Registry/>

UniMerch (React, Spring Boot)

A full-stack e-commerce web application featuring intuitive product browsing, a robust shopping cart system, secure user authentication, and a complete order management workflow.

🔗 <https://lnkd.in/gYs9n4cf>

CampusConnect (Full-Stack, System Design)

A comprehensive lost & found platform that helps university students securely report, track, and recover lost items through a modern and user-friendly system architecture.

🔗 <https://github.com/THISHA123/Campus-Lost-Found>

UniSports Hub (Web Platform, Event Management)

A modern web platform designed to streamline and simplify university sports management, coordinate event organization, and boost student engagement.

🔗 <https://github.com/THISHA123/EduFlow-Registry>

Graphic Design Portfolio (Photoshop, Illustrator, Canva)

Designed a collection of creative and promotional posters for various university events and community organizations, focusing on typography, layout hierarchy, and modern visual aesthetics.
